Being able to engage in sports and exercise freely

#### *Time Saving*

Avoid the time loss on ordering new glasses  
or contact lenses

#### *Cost Saving*

Save thousands of RM spent over lifetime for  
glasses or contact lenses

## Do you know that....

- LASIK was approved safe by US FDA in 1996
- Every year, around 12 million people perform LASIK world wide
- LASIK can also correct for presbyopia, which the need to use reading glasses for those above 40 years old

**Q: *What is LASIK?***

**A:** Laser-Assisted In-Situ Keratomileusis (LASIK) is a procedure that uses a laser to correct refractive errors by reshaping the cornea to improve vision. It can allow you to live without glasses or contact lenses.

**Q: *Why do I need to stop wearing contact lenses 2 weeks prior to my LASIK preoperative testing?***

**A:** Contact lenses can affect the shape of your cornea, similar to how a watchband can make a skin imprint on your wrist. If you have your eyes checked too soon after taking out contact lenses, several of the tests could give inaccurate results.

**Q: *Will I be able to drive after LASIK?***

**A:** Visual acuity will normally be restored very quickly after LASIK. At the first follow up visit, the specialist will tell you when you can drive a car.

**Q: *What are the risks of the LASIK procedure?***

**A:** The risks, if any are minimal. The procedure is performed in a systemized and careful manner.

**Q: *What precautions should I take after LASIK?***

**A:** Immediately after the procedure, the patient should avoid rubbing the eyes and avoid unnecessary water getting into the eyes.

**Q: *What is monovision LASIK?***

**A:** Monovision LASIK is a specialized technique in LASIK procedure to reduce the need of wearing reading glasses.

Clear Vision with

THONEH ADVANCED LASIK CENTRE

# WHY LASIK COST-WISE PROVEN!!!

## Contact lenses VS. LASIK

Average cost of contact lenses per Month **RM80**

×

RM80/month x 12 months  
= **RM960**

=

RM960/year x 30 years  
= **RM28,800**

- Average cost of contact lenses per year is **RM960**
- Depending on the eye power and type of contacts lenses. **it could be more**
- RM960/year x 30 years = **RM28,800**
- LASIK pays itself in just over **8 years** from the money saved

## GLASSES VS. LASIK

### GLASSES

**RM1,500** per pair

LASIK will pay for itself overtime, depending on the rate of inflation.

- Glasses cost an average of **RM1,500** per pair
- Depending on brand of frames and lenses, **they could be more expensive**
- An adult replaces his/her glasses **every 2-3 years**
- 15 pairs of glasses bought over 30 years add up to **RM22,500**

We provide :

**\*\* Up to 36 months \*\***

## Before the Procedure

A series of tests will be performed to ensure safety

## On the procedure day

**Do not use:**

Make-up

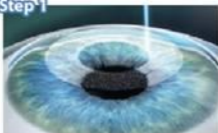

Perfume

Facial lotion

## The LASIK Procedure

Step 1

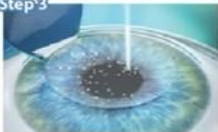

Creating the flap with femto-laser

Step 2

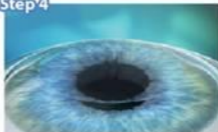

Lifting the flap

Step 3

Re-shaping with excimer laser

Step 4

Closing the flap

## After the Procedure

**Within minutes...**

After the procedure, your vision will be temporarily blurry

**24 – 48 hours...**

Your vision starts to become clearer

**In a few days...**

Your clear vision has been fully restored and you can enjoy an active lifestyle

# You should do **LASIK** if...

- You are above 21 years old

- Want a physically-active lifestyle

- Want more self-confidence

- Overusing contact lenses

- Want to save the cost on glasses & contact lenses

- Feeling stressed about having to match your glasses with your outfit
